

Title

FOREST ECOSYSTEM REPORT

Date

2001

Keywords

Digital Reports, Compendium, Criteria and Indicators

Objective

To collect and compile all research articles and data projects conducted during Phase I and II; to assign the above data to the appropriate CCFM criteria; and to update the compendium.

Description

A directory has been created that allows model forest research to be searched by subject area. Each research project has also been linked to the appropriate criterion (from the CCFM framework). The compendium has been updated to August, 2001. This project led to the production of A Decade of Excellence in Sustainable Forest Management.
