Objective

To summarize the activities undertaken in support of the provision of a communications link to share information and viewpoints between NGO's and the Model Forest partners for the 1996-1997 year.

Description

Since December 1992, the Newfoundland and Labrador Environment Network has, through its Forest Caucus, provided services to the Western Newfoundland Model Forest. This report describes these services such as communications, collaboration of groups, participation in certification process toward Sustainable Forest Management and in five year planning teams and environmental assessment of forestry plans.
