

Title

DISTRIBUTION AND ABUNDANCE OF THE AMERICAN MARTEN (*Martes americana*)
IN THE GREATER GROS MORNE AREA: FINAL REPORT

Model Forest

Western Newfoundland Model Forest

From**To**

June 2001

Keywords

american marten, Gros Morne, endangered species

Objective

To investigate certain areas of the Gros Morne landscape for the presence of marten.

Description

The project involved the use of both live trapping and bait stations to detect the presence of marten in the Gros Morne area. Two marten were captured and five bait stations were visited by marten. Tracks were observed at seven other locations
