BUILDING SUSTAINABLE FOREST COMMUNITIES

Become a Model Forest Partner

There are nine areas of participation in the Model Forest Partnership:

*Marketing Affiliate
Project Management
Community Awareness
Knowledge Transfer
Financial
Municipal
Provincial
Federal
Academia/
Educational Institutions*

Model Forest of Newfoundland & Labrador is a partnership of communities, industries, organizations and governments working together to help build our province's forest-based communities. Our partners have a shared vision of strong communities equipped and empowered to sustain our forest sector into the future.

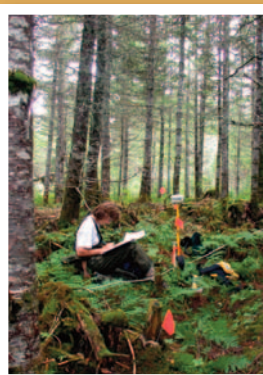

The forest sector defines many of our province's communities and the hard-working, determined people who call them home. Forest resources are at the heart of our economy through pulp and paper production, sawmilling, lumber and other forest product development, and tourism and recreational ventures.

All across Canada, the forest sector is dealing with rising energy costs, a strong dollar, global competition, and reduced timber supplies. As Canada's forest-based industries and economies rise or fall, so too do the communities that exist

because of the forest and the work it provides to thousands of Canadians.

Change is bringing opportunity to forest-based communities, where people with experience, skills and knowledge are the forest sector's greatest asset in changing times.

MODEL FOREST OF NEWFOUNDLAND & LABRADOR IS A PROUD MEMBER OF THE CANADIAN MODEL FOREST NETWORK
